CORMORANT

The affordable reverse cycle rooftop system that really packs a punch

AIRCOMMAND

Cool Comfort at your Command!

Cormorant roof top Airconditioner

- Aircommand have created the Cormorant for the Australian Market. It is an affordable reverse cycle roof top air conditioner that is packed full of features.
- Being a reverse cycle air conditioner means the Cormorant has high efficiency and provides one of the most economical forms of heating with a low ambient operating feature.

The ***Cormorant*** is:

- fully reverse-cycle, suitable for heating and cooling fully insulated caravans and motor homes up to 23ft (external) in length.
- remote controlled so you can adjust your comfort level anywhere within your caravan or RV.
- fitted with built in compressor protection against intermittent power supply.
- Quieter than any competitive unit.
- designed to dehumidify the air to help asthma suffers.
- fitted with a stylish internal plenum.
- The Cormorant is very easy to install and a large number of sales outlets throughout Australia and overseas can install or provide information on the installation.

Cormorant facts & features
